OBJECTIVE

My goal is to find a suitable workplace after graduation and to start working immediately using the knowledge and skills learned in my Computer Science Technology DEC.

PROJECTS

Fall 2024

PaintDrops

A simulation about paint drops on a surface. Features include 3 patterns generation using math formulas, drop size changing, adding and clearing drops, and performance benchmarking tool. I learned many features of Visual Studio and the use of MonoGame.

Fall 2024

Fast Food & Police Shootings

A data visualizer of 2 data sets. Comparing the 2 sets in a fun and interactive way for the users. It uses React-leaflet and Plotly to display maps and graphs to visualize data. I learned a lot about client and server-side performance and working efficiently in a team setting.

Fall 2024

NAVMBooks

A book reading app developed in Android Studio. Using downloaded books from the internet, we created an app that lets the users download and read books. I learned many of Kotlin's features used in android development and the importance of teamwork.

WORK EXPERIENCE

Summer 2022

Dishwasher • Eggspectation

Worked in a dynamic environment, maintained clean workspace, prepared dishes and utensils for dishwasher and hand-clean tougher kitchenware.

EDUCATION

May 2025 - DEC Computer Science Technology – Dawson College

PROGRAMMING LANGUAGES

- HTML, CSS, JS
- REACT, NODEJS, EXPRESS
- JAVA, C#, PYTHON, KOTLIN
- SQL/PLSQL, NOSQL

SOFTWARE TOOLS

- VISUAL STUDIO
- VISUAL STUDIO CODE
- ORACLEDDB
- MONGO ATLAS
- FLASK
- AVALONIA
- MONOGAME

Summer 2021

Miscellaneous Laborer • Finished Products • Lantic Rogers

Handled heavy loads (sugar) and transported up to 25kg of products in a repetitive manner.

Summer 2018

Intern • CLS Info

Cleaned payment terminals and computer screens for functional and clean usage. Handled phone communication with clients and relayed information to the supervisor. Updated documents about ready appliances to be returned.
